

## How to fold dollar leaves for your money tree card.

1. Start with your dollar bill.

2. Fold your bill in half. This will give you a center guide.

3. Unfold your bill and fold a corner to the center line.

4. Repeat that fold on all four corners until your bill looks like image to left.

5. Now choose a corner and you will make another fold to the center, on top of the first fold you made.

6. Repeat on all four corners until your bill looks like image to the left.

7. Now we are going to roll the bill tightly around a pencil or pen. Hold it for a few seconds.

8. Unroll the bill and adjust curl to your preference. You should end up with something looking like the image below.
